Coffee table with integrated book-shelves like hanging files

Okay, so it's not exactly *library 2.0*, but it's unique and I'd love to have one of these in our library's Teen section (or in my living room)! This coffee table has slots for hanging books, and the surface panels slide to cover sections. Unfortunately, the [ub-studio](#) website is very thin -- they say it's under construction -- and the company is located in Turkey. [Found via [Boing Boing](#).]

Haha I agree with dood, but I loved the hanging book shelves on the site. Too bad it's under construction.
